

Power Accessories ■

PowerUp®

Connect™

Next Connect™

Data and power access for KI tables.

- Convenient power/data access
- Easy connection and reconfiguration
- Simple wire management

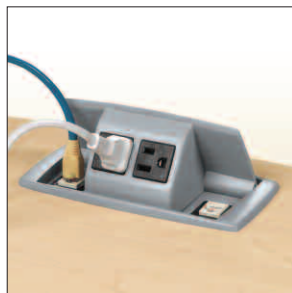

Furnishing Knowledge™

■ Accessories provide easy access to power and connections.

Power accessories give a heightened level of productivity and convenience to KI tables. By providing easy access to power and data sources, they create highly functional training rooms, meeting areas and workstations.

The PowerUp system provides easy power/data access for two laptop users.

Innovative press-and-release system stows receptacles while not in use.

Connect allows for sequential plug & play at the worksurface.

Easy-to-install Next Connect components accommodate up to eight workstations.

Power Accessories

The **PowerUp**® system conveniently provides power and data at the worksurface. Housed in an innovative press-and-release cover, PowerUp modules contain two data ports and receptacles to accommodate two laptop users per module. Each PowerUp plugs directly into a standard outlet.

Ideal for classrooms or training facilities, the **Connect**™ system allows up to six PowerUp modules to be "daisy-chained" on a single power cord. Like PowerUp, Connect does not require an electrician, and its color-coded connections ensure that the modules are always in correct sequence.

Perfect for applications where set-up or configurations may change, the **Next Connect**™ system reduces the number of power sources needed in multi-workstation spaces while neatly hiding power cords inside its beam. Next Connect may be used alone or in conjunction with PowerUp modules if surface access is desired.
