## Other Attributes:

**Packaging:** KI has other corporate initiatives that can support LEED credits. For example: KI's packaging has large amounts of recycled content – an average of 78% corrugated material, where corrugate is used. Wherever possible, KI will blanket wrap thereby eliminating the packaging waste. These packaging options help to support LEED NC & CI – MR 2.1 and MR 2.2 *Construction Waste Management* or LEED EB - MR Prerequisite 1.1 *Source Reduction and Waste Management*.

**End-of-Life Recycling & Reuse:** KI selects materials that can be recycled at the end of a product's use and designs its products so that it can be easily disassembled and separated for local recycling facilities.

**Renewable Materials:** KI has the option to include bio based foam in the seating line.

**Certified Wood:** For LEED requirements, KI can substitute the material for FSC materials upon request. In some cases an additional premium may apply.

**No-Added Urea Formaldehyde** – Available upon request.

**Fabrics:** Fabric option is available with this product. Fabrics selections may contain between 0%-100% recycled content. Renewable materials in textiles are also available.
