

Pallas®

Tradewinds™ Collection

Billows has an elegant weave, created by two yarns: a dupioni yarn that gives the fabric an irregular texture, which is then softened by a chenille yarn just peeking through – like clouds on a windy day.

Thunder's three-dimensional design reverberates with texture, like a storm rumbling and crackling with sound.

Whisk has a sateen feel and a painterly brushstroke that's all about movement – a gusting, churning wind that whips the hat off your head.

Flame Resistance

Passes California Bulletin 117 Section E. Flame resistance refers to a fabric's ability to resist burning.

Colorfastness to Wet & Dry Crocking

Passes AATCC 8 Dry Crocking, Class 4 minimum. Wet Crocking, Class 3 minimum. Colorfastness is a fabric's ability to retain color in various conditions. Crocking refers to the rubbing off of color from a fabric when subjected to abrasion.

Colorfastness to Light

Passes AATCC 16A or AATCC 16E Class 4 minimum at 40 hours. Colorfastness to light refers to a fabric's ability to resist fading when exposed to light.

Physical Properties

Passes Brush Pill ASTM D3511, 3 minimum. Pilling is the formation of fuzzy balls on the surface of a fabric. Pilling occurs when loose fibers in the fabric are worked to the surface after the fabric is subjected to abrasion. Passes breaking strength ASTM D3597-D1682-64, 50 lbs. minimum in warp and weft. Breaking strength measures a fabric's ability to resist tearing or breaking when subjected to tension. Passes seam slippage ASTM D3597-D434, 25 lbs. minimum in warp and weft. Seam slippage refers to the conditions when fabrics pull apart at a sewn seam.

Abrasion

Passes ASTM 3597 modified (10# cotton duck) 30,000 double rubs Wyzenbeek method. Passes ASTM D4966 (21 oz. weight) 40,000 rubs Martindale method. Abrasion resistance is the ability of a fabric to withstand surface wear from rubbing.

Terratex

A classification of environmentally conscious fabrics that are made from 100% recyclable or renewable material.

Green-e

100% of the electricity used to make these fabrics is matched with renewable energy certificates.

Billows 27.130

Grade: PI
Content: 44% Cotton, 41% Polyester, 15% Viscose
Width: 54"
Symbols:     

Thunder 27.132

Grade: PI
Content: 100% Recycled Polyester
Width: 54"
Symbols:       

Whisk 27.129

Grade: P3
Content: 92% Wool, 8% Nylon
Width: 55"
Symbols:

Pallas® Textiles Introduces Tradewinds™ Collection

The Tradewinds Collection of three jacquard and dobby upholstery textiles by designer Lori Weitzner freshens up the design scape with winds of change: “fashionable fabrics” with innovative weaves that provide movement rather than pattern, newly softened textures and a fabulous range of brightened, lightened, very usable – not trendy – colors.
