KI'S SMART TOUCH FILES OPEN WITH EASE, OFFER SLEEK LOOK FOR CORPORATE INTERIORS

CHICAGO – KI introduces Smart Touch™ files, a filing and storage system created with a KI-exclusive slide suspension to quickly and easily open drawers with a single touch. By eliminating handles and knobs, the smooth look of the files' flush fronts enhances the design of the filing system while providing storage for practically any media type. Smart Touch files are on display at KI's showroom, Ste. 1181, at the 2007 NeoCon® World's Trade Fair.

Inspired by the sophisticated look of European storage and filing systems, Smart Touch files enable designers to create banks of files with a clean, modern aesthetic without compromising the functionality and versatility.

Smart Touch files come in a variety of drawer and cupboard configurations. For additional design flexibility, KI's color-match program ensures the filing system complements fabrics, surface materials or other manufacturers' colors in the office space.

"As a leader in specialized filing and storage systems, KI studied the needs of our customers and developed Smart Touch storage systems to blend in with contemporary corporate interior design, provide superior functionality and contribute to office productivity," said Jonathan Webb, senior product manager, KI. "Smart Touch files minimize document retrieval time, maximize space usage and can be custom-designed to match any office motif."

In addition to its sleek design, functionality and durability, Smart Touch files are also environmentally friendly. Made from cold rolled steel, an average of 33 percent of the product's components are easily recyclable.

Smart Touch files' durability is unmatched with enhanced strength and security from an incorporated direct-drive lock and interlock system, as well as a rigid box frame created by heavy gauge modular vertical uprights. Smart Touch files are backed by KI's lifetime structural integrity warranty (suspensions are warranted for 10 years).

KI manufactures innovative furniture and wall system solutions for education, healthcare, government and corporate markets. The employee-owned company is headquartered in Green Bay, Wis. and operates sales offices and manufacturing facilities in the United States, Canada, Europe and Asia. KI tailors products and service solutions to the specific needs of each customer through its unique “Market of One” customer service and manufacturing philosophy.
