

- Mix them.
- Move them.
- Make them yours.

■ **Unbeatable durability. Unlimited configurations.**

Flexibility from start to finish.

With an abundance of options, Logix lets you create pleasing and effective public spaces. Select from KI's wide variety of fabrics or COM. Choose from five fiberglass finish options in lots of colors or, have KI match the finish to your custom color.

Seating

Six shapes – curved or straight, with or without backs.

Tables

Five table shapes – curved or straight. Laminate top tables are 12" high. Fiberglass top tables are 22" high.

Planters and Trash Receptacles

Five shapes – curved or straight, in a variety of stackable heights.

Fiberglass finish options.

Terra Cotta - Lightly textured and sealed with a low-sheen finish.

Gloss - Buffed to a smooth, shiny finish.

Matte - Lightly sanded then sealed with a low sheen finish.

Polycrrete - Embedded with sand, sandblasted smooth, then sealed with a low sheen finish.

Granex - Embedded with synthetic granules for a unique speckled appearance with a smooth, shiny finish.

Logix® System Site Furnishings

Seating ... and tables ... and planters ... and trash receptacles. They stand back to back. End to end. Or all alone. They curl around corners and circle columns. You can easily arrange them. Rearrange them. Your configurations can start small. Grow as needed. There's nothing like Logix modular furnishings — without a doubt, the smartest solutions for any public space.

What's the shape of your interior landscape?

Whether it's an airport lounge, student center or office building, the aesthetic appeal of your public areas is increasingly important to your visitors. Logix System gives you that appeal, but in a highly sensible, practical way. The seamless fiberglass construction of each Logix component makes it extremely durable, yet lightweight and easy to maneuver.
