

Pallas®

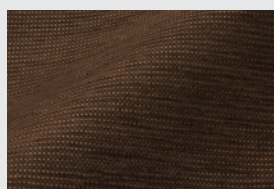

Cryptons

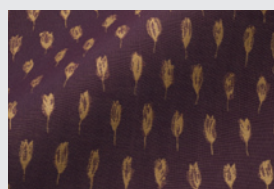

Crypton fabrics use an environmentally friendly patented process to integrate performance into every fiber (unlike applied coatings, topical treatments or laminates) with its revolutionary technology – INCASE fabric protection. This formulation and the use of Silver Ion technology provides multiple levels of fabric protection such as stain, water and odor repellency and bacteria resistance. Most spills on Crypton fabrics clean easily by wiping up the spill with a clean cloth. For dried stains or more difficult stains, a soap-and-water mixture can be used. A five-year warranty guarantees that no spills, stains, fluid or bacteria will ever penetrate this amazing upholstery fabric with permanent moisture barrier.
