**KI FEATURES FURNITURE AND EXPERTISE FOR CORPORATE, HEALTHCARE
AND HIGHER EDUCATION MARKETS AT NEOCON®**

CHICAGO – New furniture and current offerings that enable stylish, collaborative workspaces, healing environments, and advanced learning settings are among the featured solutions in KI's showroom, Ste. 1181, at the 2007 NeoCon® World's Trade Fair.

Complementing the extensive product displays, KI's market experts will be on hand to talk with attendees and share ideas about furniture's role in supporting trends in higher education, healthcare, business and government markets. White papers on education spaces and office ergonomics will also be available.

"Our redesigned showroom offers a unique blend of innovative products and market expertise," said Mike Tennity, vice president of design and development, KI. "Our showroom demonstrates KI's ability to provide furniture throughout a facility in each of our core markets. Visitors will learn how KI furniture solutions can be applied across various segments, such as educational furniture that is used in corporate training centers or systems furniture for any administrative area.

Market Focused Areas

The Healthcare area of KI's showroom spotlights two award-winning product lines, the LaResta® day bed and Soltíce® collection. The LaResta day bed represents an ideal solution to the heightened demand for guest sleepover accommodations in patient rooms. An attractive sofa by day, the LaResta day bed comfortably seats four adults. By night, its intuitive design makes conversion from a sofa to an inviting 34" x 75" sleep surface smooth and simple. The LaResta day bed is a 2007 Best of NeoCon nominee.

Soltíce, KI's broadest healthcare collection, includes elements ranging from a loveseat to a lounge sleeper, recliners and multiple seating for private rooms, waiting areas and signature lobbies. With Soltíce, interior designers can carry a consistent visual signature from a hospital's public space to the patient room environment. Soltíce earned a Best of NeoCon award in 2006.

KI will show how its solutions support learning environments in a range of classroom and other settings at the Education area of its NeoCon showroom. KI's mobile furniture, including All Terrain[®] tables, screens and markerboards and Torsion[®] on the Go! chairs, will be featured in a classroom setting. Flat Screen Garage[®], which securely stores flat screen monitors in a protective covering beneath the surface of a table, will be displayed with tables that feature built-in power modules. Other products in the Education section include the Wharton[™] lectern, fixed and auditorium seating, and Archive[™] customizable library furniture.

The height-adjustable Genesis[®] desking system meets the needs of employee productivity, design flexibility and functional versatility across all markets. Shown in the Business area of KI's showroom, Genesis desks meet the unique needs of each user and can be lowered or raised from the traditional 29" height to between 22" and 51" based on the method specified for controlling adjustability. Genesis desks offer three options for adjusting heights: pin, crank or electronic.

KI's new Athens[™] tables create flexible meeting areas in higher education settings and also can be utilized in corporate environments as a casual workspace. Another product debuting at NeoCon, Inquire[™] tables, are also an ideal solution for meetings, training and other collaborations.

Visitors will see KI's new Smart Touch[™] files, a filing and storage system crated with a KI-exclusive slide suspension to quickly and easily open drawers with a single touch. Inspired by the sophisticated look of European storage and filing systems, SmartTouch files enable designers to create banks of files with a clean, modern aesthetic without compromising the functionality and versatility.

Other solutions in the Business area include Genius[®] architectural walls that accommodate a range of designs and uses, and StudioWorks[™], which features an array of systems furniture and architectural elements that can be combined to create an elegantly designed workspace. The collection includes lifted panels, tethered screens, benches that combine seating with storage, collaborative work islands, storage cubbies and more. Casegoods, task seating, tables, systems furniture, and storage products will also be on display.

The Pallas[®] section of KI's showroom features two new collections, Common Ground and Tribute. The four patterns that make up the Common Ground collection can be used independently or in combination to achieve beautiful results. Common Ground offers patterns and colors that complement existing finishing standards, giving designers

additional options for aesthetics and performance. Common Ground also creates a tie back to earth with each pattern named after one of Mother Nature's creatures and contains environmentally friendly aspects: Busy Bee, Work Horse, Turtle Neck and Holy Cow.

Tribute is a new environmentally friendly upholstery collection and one of the first to be made from bamboo fibers. The two lines in the Tribute collection, Endurance and Perseverance, pay homage to the beautiful intelligence of nature, offering a sensual hand, intriguing luster levels, and brilliant color play with the legendary resilience of bamboo.

"We look forward to meeting with customers, understanding their needs, sharing our expertise, and offering them solutions," said Tenny.

KI manufactures innovative furniture and wall system solutions for education, healthcare, government and corporate markets. The employee-owned company is headquartered in Green Bay, Wis. and operates sales offices and manufacturing facilities in the United States, Canada, Europe and Asia. KI tailors products and service solutions to the specific needs of each customer through its unique "Market of One" customer service and manufacturing philosophy.
