NINETEEN KI PRODUCTS AND SYSTEMS EARN GREENGUARD CERTIFICATION

BALTIMORE – Nineteen KI tables, workspace systems and storage products recently earned GREENGUARD Indoor Air Quality Certification® for low emitting products by the GREENGUARD Environmental Institute (GEI). Several of these products are on display at NeoCon® East 2007 in KI's space 2059.

“Specifying GREENGUARD-certified furniture is a crucial step for customers who want to achieve LEED certification,” said Norman Nance, IIDA, LEED®AP, vice president-marketing, A&D and environmental initiatives, KI. “Obtaining GREENGUARD certification for all of our products is an important initiative for KI, to help our customers meet the standard for LEED certification, and to help protect the environment.”

Over the past year, 25 of KI's seating collections, its Genius® architectural walls, its Prosper® panel system, and four of its desking systems received GREENGUARD Indoor Air Quality Certification for low emitting products.

To achieve GREENGUARD Certification, each product listed passed a series of demanding tests required by GEI that determined the products have low chemical emissions. GEI will monitor these products each quarter to ensure it maintains low emitting status.

GREENGUARD Certification is a referenced standard for furniture and other interior product manufacturers to be specified in projects based on the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) Rating System™. LEED is a voluntary, consensus-based national standard for developing high-performance, sustainable buildings. GREENGUARD certified furniture earns points toward a project receiving certification under the LEED for Commercial Interiors program.

GEI's methodology for testing and certifying furniture was developed and validated in the U.S. Environmental Protection Agency's Environmental Technology

Verification Program. Realistic, worst-case configurations of a product's components and materials are developed and placed in environmental testing chambers.

GEI is an industry-independent, non-profit organization that oversees the GREENGUARD Certification Program. As an ANSI Accredited Standards Developer, GEI establishes acceptable indoor air standards for indoor products, environments, and buildings. GEI's mission is to improve public health and quality of life through programs that improve indoor air.

KI manufactures innovative furniture and wall system solutions for education, healthcare, government and corporate markets. The employee-owned company is headquartered in Green Bay, Wis. and operates sales offices and manufacturing facilities in the United States, Canada, Europe and Asia. KI tailors products and service solutions to the specific needs of each customer through its unique "Market of One" customer service and manufacturing philosophy. GREENGUARD certified.**

Recent GREENGUARD-Certified Products from KI

Tables	
Datalink® Powered Tables	A highly flexible, easily reconfigurable table system, with “computer-friendly” design and laid-in wiring.
PowerComm® Powered Tables	Strategically combines convenient power and communications cable management, modularity and durability into a comprehensive table system.
In Tandem® Powered Tables	Economically priced tables that conceal power distribution and allow for access from either front or back sides.
Barron®	Contract table line with exceptional finish quality and reliability.
Hurry Up®	Nesting, locking, lightweight tables that are available on casters for easy mobility.
Synthesis™	Tables designed for easy collaboration and connection, featuring integrated wire management.
Portico®	Flexible, high-value tables that satisfy all applications requiring folding, fixed or flip-top designs, modesty panels, ganging, wire management and modular table systems.
Trek®	Uniquely shaped flip-top table designed for easy storage.
Venue®	Tables with an unlimited array of high-quality components. Available with bases, tops, edges and chair finishes to match.
Laptop Garage®	Innovative storage for laptops within tables.
Flat Screen Garage®	Work surface that transforms into a computing center in seconds.
Systems	
All Terrain®	System that includes binder towers, storage bins, marker boards, monitor stands, nesting tables, pedestal files, screens, storage towers and tables.
Flexible Workspace®	User-adjustable, freestanding workstations that are perfect for teaming, brainstorming or individual projects.
System 3000® Panel System	Panel system available in a wide range of colors designed to absorb ambient noise.
Wireworks® Panel System	Panels designed for use in call centers, teaming areas and training facilities. Also works for private offices, closed door meeting rooms and the boss's suite.
Power Up® Module System	Mounts onto a variety of work surfaces and offers a multitude of power and data access solutions.
Storage	
Balance Overhead®	Overhead file system with a colored or translucent extruded PVC door for easy viewing.
700 Series® Files and Storage	File system that includes lateral and vertical files, credenzas, cabinets, bookcases and more.
E-Series® Files and Storage	A heavy duty and cost effective lateral, pedestal and vertical filing system.
