

Flex™ Recliner ■

Flexible comfort with stylish form.

- Functional design
- Multiple options
- Unmatched comfort

■ **A comfortable patient chair with flexible options.**

**Sit back and put up your feet.**

The Flex Recliner exhibits the flexible functionality that recovering patients need, offering three restful positions for reclining. Whether you're looking for function or form, it's sure to deliver.

Whether seat, back, foot-rest, or side panels, the ability to remove and replace the Flex Recliner's upholstered panels and covers "in-field" is quick and easy, thanks to the simple pop-and-snap connections.

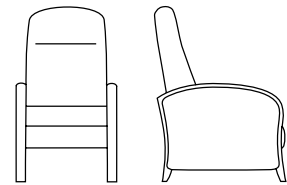

Lock the articulating table in the up position for a treatment or serving side board.

**Flex™ Recliner**

The Flex Recliner is our most popular patient recliner for many reasons: it combines the flexibility of multiple accessory options, while providing patients with unparalleled comfort and stability. Its curved lines, contoured back cushion, and three seating positions make it a restful and extraordinary hospital recliner. In addition, easy-to-change replacement covers, panels and a side table that folds down as needed, make it the only choice for the recovering patient.
